FEATURED PROJECT

Loan Management System

AI-powered development environment focused on software engineering automation, AI-assisted workflows, observability, and resilient system design. The project combines local AI technologies with modern engineering practices to improve developer productivity.

Stack: Python, FastAPI, React, Ollama, SQLite, VS Code Extension

Portfolio: chesza.com

PROFESSIONAL EXPERIENCE

Software Developer | Scrum Master

Aug 2021 - Present

GBS Data Corporation S.A. · Costa Rica · Remote

- Develop and maintain enterprise financial and accounting software using C#, .NET, SQL

Server, JavaScript, HTML, and CSS.

- Design automation solutions, APIs, background services, monitoring tools, and utilities to improve operational efficiency and system reliability.
- Optimize SQL Server queries, stored procedures, and data workflows supporting reconciliation, reporting, and data processing operations.
- Build user-facing features, dynamic filters, export functionality, and tools that reduce manual operational effort.
- Serve as Scrum Master, facilitating Agile ceremonies, removing impediments, and supporting continuous improvement across technical and business teams.

Co-Founder | Digital Art Director & Web Developer

Mar 2016 - Jun 2021

CoDe_crc · Cartago, Costa Rica

- Led digital creative projects and developed business websites using HTML, CSS, JavaScript, WordPress, and WooCommerce.
- Managed hosting, cPanel administration, domain configuration, corporate email setup, deployment, and client-facing project delivery.
- Delivered e-commerce, branding, and digital marketing solutions aligned with client requirements and business goals.

Earlier Experience

Digital Media, Editorial Design, Web Operations, Market Research & Public Sector Support

Previous roles include Media Monitoring Associate at IMACORP, Digital Content, Design & Website Operations Specialist at Internet Tropical Paradise, Editorial Layout Designer at Newspaper La Prensa Libre, Sales & Market Research Assistant at Graphic Solutions, and Executive Assistant & Operational Support for Costa Rica's Y2K National Commission at MICIT.

These roles built a foundation in digital publishing, web operations, graphic design, editorial production, research, reporting, stakeholder communication, and deadline-driven execution.
